## GOOG - Google Inc.

Posted by Sherwin Go - 2007/02/12 16:13

---

Well our favorite search engine has a pattern which I believe is a double top if it materializes... As we can see from this chart breakdown is around \$452 and the target is \$402 to the downside.... However if does not materializes and bounces back maybe we can go long and assume it will retest the previous high of around \$510 and if it dosen't breach it this could be the stage for a triple top. Lots of possibilities for GOOG. And by the way I don't know why but I love that symmetrical triangle over there for some reason :lol:

Note: My bad nakalgay sa chart double bottom, its actually a double top....

Now ko lang pansin may bearish divergence pala ito.

Back \$400 you say?

---

Priase be to Google. Reported a jump of 61% in net profit from a year ago. STock jumped a little over 3% in the after hours.... I was just short 2 weeks ago in GOOG buti talaga for technical analysis, more than making money it helped me NOT LOSE TOO MUCH MONEY :lol:
