Wag mo na sayangin panahon mo sa walang kwentang stock na ito :lol:

(I just have a bad memory about OV when it was still not a basura)

its worth watching. Its currently consolidating.. Who knows baka mag cup and handle pa ito. But what jep is pointing out is the surge in volume activity which cannot be ignored. Usually, attempts to move higher accompanied by acceleration in volume are early signs of an impending omic... ah este bullish trend. :D

boss scorpion25 hindi ako isa sa mga sirs, pero tingin ko rin nagbreakout na nga siya @ .028 with volume of more than 2B shares and with the TP of .041!
please comment mga sirs kung correct or mali.
