Errr... volume did increase but no breakdown occurred. So it's just an uptrend....

=====

Re: LR

Posted by washer31 - 2007/05/16 02:54

Possibly a consolidation will occur before breakdown.

oliver, comment lang on your trendline, it's a little bit incorrect. there's no bounce pa at current levels, in short the trendline has been broken.

man that rounding bottom is huge! :laugh:

don't force it if you can't find a pattern, move on to another stock ;)

...

Re:LR

Teka, nagbreakout na ba si LR sa wedge nya? Bakit parang walang volume?

...

Remember, wedgies are minor consolidations, 3 weeks tops. Be careful, this should not be seen in the weeklies....

=====

Re:LR

Posted by bcdytoc - 2008/02/11 10:31

Parekoy, flags & pennants ata ang dinidescibe mo na 3 weeks tops ang consolidation. Wedges are still considered triangles, therefore di lang 3 weeks yan.

=====

Re:LR

Posted by mickymac - 2008/02/11 10:43

err... di ba kasi temporary pause lang yan kasi profit taking? so wedges cannot be the same as triangles, if this is found on the weeklies, then it's a downtrend consolidation or a range.

=====

Re:LR

Posted by bcdytoc - 2008/02/11 16:19

teka, medyo hinalo mo na ang psychology of the wedges with the time frame required for a legit wedge.

All continuation patterns are pauses in the trend, whether intermediate in nature or short term. Ang wedge ay isa pang klaseng triangle na iba lang ang psychology. But as far as time frame required, a wedge is intermediate in nature.

Only flags & pennants are 3 weeks max in the making. Pero tingnan nga natin ano ang sabi ni Lolo John Murphy.

=====

Re:LR

Posted by mickymac - 2008/02/13 22:16

Di pala 3 weeks, 3 months pala maximum ng wedge...
