PEP

Posted by meekes - 2008/01/06 20:52

Something's pepping up PEP :lol: Gapped up last Friday with high volume, 14.8M shares traded. Probably a case of an unusual breakout from a descending triangle. If we consider the descending triangle, TP is at 1.60. We can confirm by Monday if this is really bullish inspite of a bearish market sentiment.

I think the breakout from the cup and handle was already accomplished with high volume last dec.6 from 1 to 1.50

Notice that one too Nix. Possible to have a cup and handle within a cup and handle formation?

=====
