Ayan Gwen, ayan ang litrato ko. Masaya pa ko nung kinunan ang litrato, tumatakbo pa kasi akong senador nung panahon na yan. Pero ngayon, hindi ako masaya dahil nakakulong ako ngayon.

Mabuhay ang Pilipinas! Mabuhay ang MAGDALO GROUP!

hey, nice website we have here! congratulations yeahbah!

colors are great. baka pwede rin lagyan ng real time stock ticker dito and alerting capability (i.e. up to the date alerts of buy or sell for a certain stock)! hahaha

one thing i hope we can revise is the sorting of the messages. is it just me or i see the most recent posts at the bottom of the page now vs. on top before? furthermore, i am somehow used to seeing the most recent post on page 1 vs clicking at the very end of the page (i.e. most recent is page 1 vs. page 5 now?). i think these can be modified to reduce additional scrolling and clicking of links..

hmmm i will look into it. bata pa kasi tong forum software na ito, may mga napansin din akong little buggy bugs. I can't do any quick fixing kasi it will ruin the version control. Sasakit lang ulo ko sa upgrading :D

I will just forward any buggy bugs to the developers of this forum then wait for the patch to be released.

thanks!
