Arnoldb here batch 25!

My TA on this US stock, ABCW.

A H&S between mid-august to about mid-september. Then, it reversed trend. Now it has formed an inverted h&s this time. Impending reversal again with a TP of around \$28.

Comments please!;)

Thanks!

Sir,

Average volume is 103,192.

MACD seems to agree as well. 12,26 line now above 12,26,9. Both lines oscillating a little below zero which also might support trend change.

Thanks!

ArnoldB
