
NZD/JPY

Posted by Sherwin Go - 2007/12/10 12:18

One of the more popular carry trade pairs with NZD having the highest interest rates among industrialized nations at 8.25% and Japan having the lowest at 0.50%

But here is what I am looking, on the daily it failed to break the triangle and it looks like it might retest the 82 level towards the triangles support. Pretty good risk reward cut na lang if it breaks the triangle.
