A lot of analyst are quite very bearish with USD/JPY... bakit di natin silipin ang monthly charts ng USD/JPY, some are predicting this could drop to as low as 80 to 90 range. You dont have to be an economist to find out..... tingnan maigi.....wapak!! http://www.absolutetraders.com/images/fbfiles/images/usdjpy_monthly.gif

USD/JPY is now starting its ascent. Watch resistances on the HOURLY chart for a good short entry...there is a good chance this will drop to 102.....and we can enter a low risk short trade.... BOOYAA!!!
