
Yeahbah's 48 dollar Forex Account

Posted by yeahbah - 2007/03/01 07:59

The Foreign Exchange is the best place to lose a lot of money in a short period of time. With the help of my fund manager, we have successfully trimmed our \$x,xxx forex account to \$48 in just two months. Pretty quick ei?

Three days ago, armed with \$48, I decided to trade the forex again...\$38 na lang ngayon :lol:

Whipsaws here and there, stop losses getting hit in a just a few minutes; thanks to the ever volatile XAU/USD (gold). Yoko na, our trading strategy doesn't work! Well it works great if you intend to lose a lot of money. I need a new one...eto na makiki Bukojoe-Kolachi method na rin ako. Slowly but surely.

Trade log:

20:47 - Shorted USD/JPY at 117.580

22:55 - Doing +54.4 pips, still holding, waiting for a cover signal. Maybe tomorrow morning.

OIC Oanda pla.. I had fxcn.. "had" kc di ko na magamit... but I no longer long for doing forex again. It was like good buy \$250 in 2 week.

Mas ok magstocks. Di kasing likot na isang kurap lang laking luging na. Pwede mo pa keep open overnight di tulad forex.

lessons learned ;)

yup, isang kurap lang pwede ka na malugi. One time kumuha lang ako ng sandwich pagbalik ko, from +20pips, naging -30pips. Nangyari na naman sa akin nung isang araw, may kumausap lang sa akin, pagtingin ko sa screen...from +50pips naging -10pips :lol: buti na lang nakalabas pa rin ako with +50 something pips. Trend is your friend, so as long as the trend is intact you'll be alright ;)
