eto lang:

- * adjusted na dapat yung mga splits. useless ang chart pag bunge bunge dahil sa splits
- * up to 3 MAs
- * fibonacci functions
- * drawing tools (lines, curves etc.)
- * 5-10 years worth of data para pogi
- * kung masipag sila, lagyan nila ng tags yung chart, say tags for dividends, splits, press release and whatnot.
- * charts for sector indeces

yun lang

here some for me

- * ability to add/include several MA into the price charts,
- * maybe ability to add other charts into the price charts
- * ability to add/delete general indicators. right now its pegged at two what if I just want 1 :P
- * add yung mga splits and stock dividends ratios and the date. probably as text below the chart(just like in yahoo)
- * download raw data and include splits/stock div.

yun lang :laugh:
